

Rowseed S

Light single row seeder, tractor mounted

The Rowseed S was specially designed for precision sowing of seeds from a single ear and/or single plants, and thus supports comparisons between ears or their progeny.

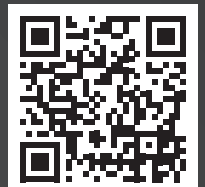

Your benefits summed up:

- Easy and safe operations thanks to a clear-cut layout
- Easy track width and row spacing adjustment
- Wide application scope thanks to a variety of feeding variants such as magazine systems, central seed distributor, or single funnel
- Seed embedding for a variety of soil conditions thanks to a selection of opener systems

A variety of distribution systems allows for mix-free distribution of the seeds of a single ear within a row. The modular system with its many options allows you to customize the machine for many different applications.

Attachment	Tractor mounted 3-point
Track	1250 – 1750 mm (49" – 68")
Transport width	2000 mm (79")
Weight	Starts at 400 kg (880 lbs)

We reserve the right to make technical alterations.

Rowseed S

Technical data

Attachment options	3-point hydraulic system on tractor
Track/transport width	1250 – 1750 mm / 2000 mm (49" – 68" / 79")
Row numbers	2 – 6 rows
Tires	5.00-15AS
Weight	Starts at 400 kg (880 lbs)

Feeding of the seed distribution system

Single funnel	One filling funnel per row
Rotary distributor and distributor head	2 – 6 rows, seeds are distributed across all rows
Central seed distributor	Seed is distributed over multiple rows
Magazine system	Seed is filled into a 4 or 6-row magazine and distributed fully automatically

Plot length

Multi-stage gearbox	1 – 15 m
---------------------	----------

Seed distribution systems

Variants	6 belted cones with 120 mm or 4 with 195 mm
----------	---

Control unit

Control unit	Global Seed Control (GSC)
--------------	---------------------------

Opener systems

Shoe opener	ISARIA or NODET
Single disk opener	ACCORD CX
Double disk opener	NODET

We reserve the right to make technical modifications.
